**Customers in the Health Care/Bio-  
Technology/Pharmaceuticals Industry**

## Health Care/Bio-Technology/Pharmaceuticals

Life sciences companies continually strive to develop new products and improve their existing product line. This requires effective portfolio management. Selecting the right targets, get them to market faster, minimize time to peak sales, and increase market share— are paramount to succeeding in this volatile industry where being late with a product sometimes means missing the entire market. **Seavus Project Viewer** provides cost effective project management solutions to insure that project teams are always aware of the status of a project.
