

Seavus Project Viewer

The complete viewer for Microsoft® Project files

Customers in the Manufacturing/Retail Industry

Manufacturing/Retail

Manufacturing and retail companies are undergoing massive upheaval as differences in global wage structures encourage off-shoring of goods and services. This creates a new paradigm - virtual teams working on a manufacturing project from thousands of miles away. Facilitating smooth communications between these team members means products can be completed and delivered on time and on budget. As a companion product to Microsoft Project®, **Seavus Project Viewer** can extend communications between these team members cost effectively.
