

Turn your project plan into project success

Choose the Leading Viewer for Microsoft® Project (.mpp) files to ensure superior team involvement towards reaching your project's goals.

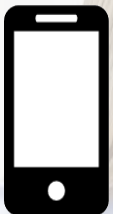

Team members will be open to view your project plans and see 100% of the views included in MS® Project regardless of the version the plans are created in. They will analyze .mpp files with exact look and feel as in MS® Project, with no additional training required.

Open .mpp files on Mac

The Mac users in your company will be able to open, view and analyze .mpp files in the three most common MS® Project Views: Gantt Chart View, Task Sheet View and Resource Sheet view, thus getting completely 100% accurate information with the rest of the team.

Work mobile

Stay up-to-date with your project with Seavus Project Viewer™ for Mobile and always meet your team's deadlines. Simply open your .mpp file directly from your e-mail inbox and see the Gantt Chart, Task Sheet or Resource Sheet in just a few fingertips.

Notifications on Apple

Connect to your OneDrive for Business and select projects you would like to monitor, select day and time to receive project status notifications. Also, you can get the latest project

Supported Operating Systems

Available on all major operating systems.

SAVE 90% ON SOFTWARE LICENSING COSTS

Reduce the budget spent on software products in your company. You can acquire the leading Viewer for MS® Project files and save costs by deploying one of the available licensing models.

WORK WITH PROFESSIONAL GRAPHICAL REPORTS

Allow your team a greater involvement in the project success - Open any Microsoft® Project file (.mpp) and see the graphical reports as in Microsoft® Project 2013.

SHARE THROUGH SHAREPOINT, ONE DRIVE

Keep your project plans on a shared location on Microsoft® SharePoint Online, or your in-house servers. Moreover, Google Drive and One Drive cloud storages are also available.

Seamlessly deploy the leading viewer for Microsoft® Project files to all devices in your company.

Available for seamless deployment, the superior .mpp viewer will provide team members which only need to view and analyze .mpp files with support for all views included in MS® Project in a familiar environment. Choose a licensing or subscription model, tailored to fit your company's infrastructure and empower project members with a greater control over their project tasks.

SUPPORT FOR MS® PROJECT 2016

Seavus Project Viewer™ 2016 will support viewing, analyzing and printing project files created in Microsoft® Project 2016, in addition to all previous versions of Microsoft® Project, from Microsoft® Project 2007 onward. With Seavus Project Viewer™, users will see the same visual effects as those in Microsoft® Project 2016, such as the new style contained in the Gantt bars for Auto and Manually scheduled task, Inactive task as well as Gantt bars style colors and fonts.

WORKS ON MS® WINDOWS 10

Seavus Project Viewer™ supports the Microsoft® Windows 10 Operating System. This is in addition to our currently supported platforms (Microsoft® Windows 8.1, Microsoft® Windows 8, Microsoft® Windows 7, Microsoft® Windows Vista, Microsoft® Windows Server 2012 R2, Microsoft® Windows 2008 all editions).

USE GRAPHICAL REPORTS

Seavus Project Viewer™ comes with brand new visual reports and dashboard, allowing team members, team leads and other project participant to view the health of the project plan. Using the visual reports team members can view the upcoming tasks, which tasks are behind the schedule or to get information regarding the critical tasks in the project plan while the team leads, project stakeholders can observe the tasks and resource costs and analyze whether they are aligned according the project budget or to be informed about the project status via the burndown reports.

OUR CUSTOMERS

Existing successfully on the market for almost a decade, Seavus Project Viewer™ has gained millions of satisfied team leaders, team members and project stakeholders (vendors, distributors, suppliers, sub-contractors). Seavus Project's Viewer™ portfolio includes companies such as:
